

Company Profile

Energy Management For Industrial Plants

CREATIVE, HANDS-ON, INDEPENDENT

Who We Are

An independent engineering company specialised in energy management for the industrial sector

What we do:

- PLAN & DESIGN
- IMPLEMENT & OPERATE
- FINANCE (Contracting)

engineering solutions that increase energy efficiency and reduce CO₂ emissions in industrial plants

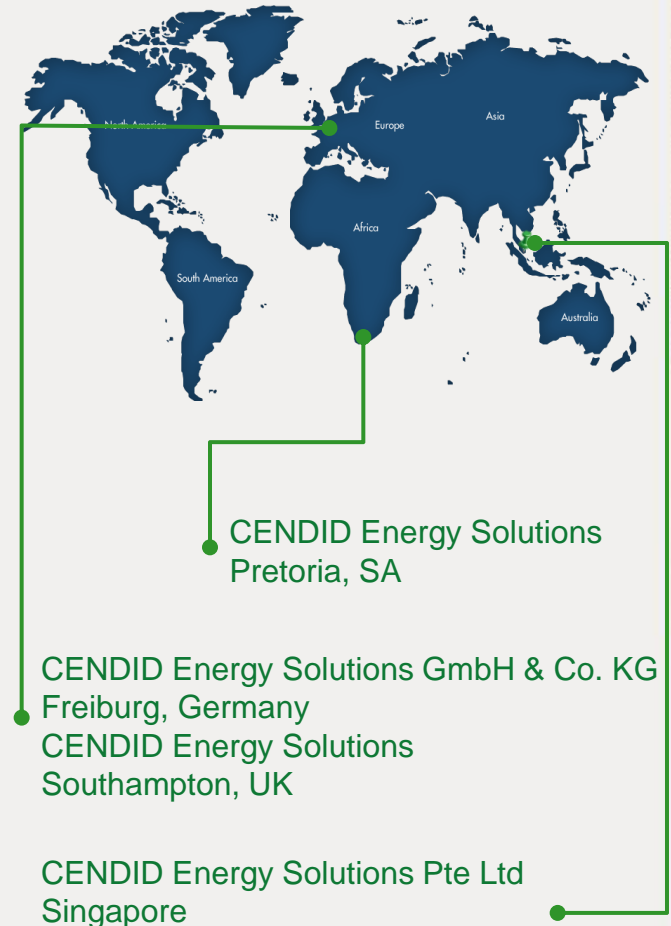

Our Success Story:

- Completed over 120 successfully energy management projects
- Across major energy intensive industries
- Leading to a total energy cost reduction of more than 70 million Euro per year

Our Team:

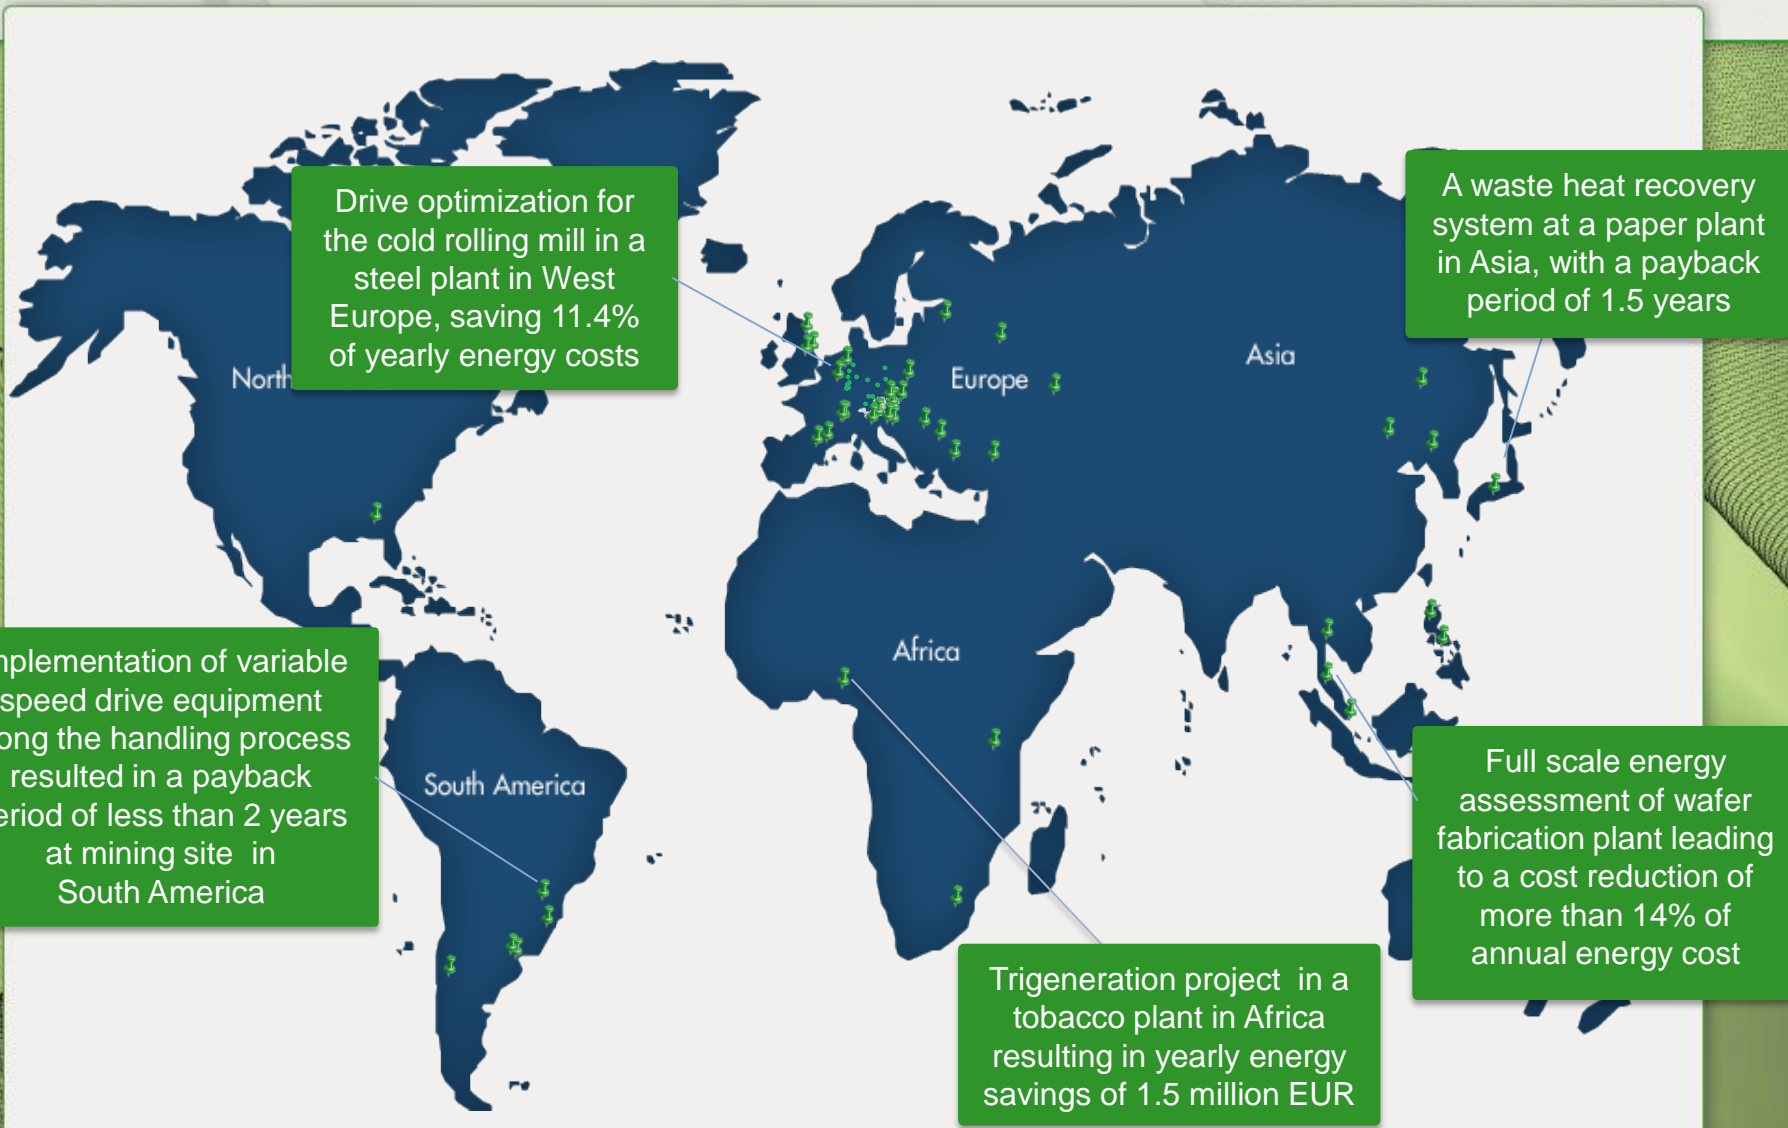

- Multinational team of dedicated energy, design and process engineers

Our Offices:

Global Reach

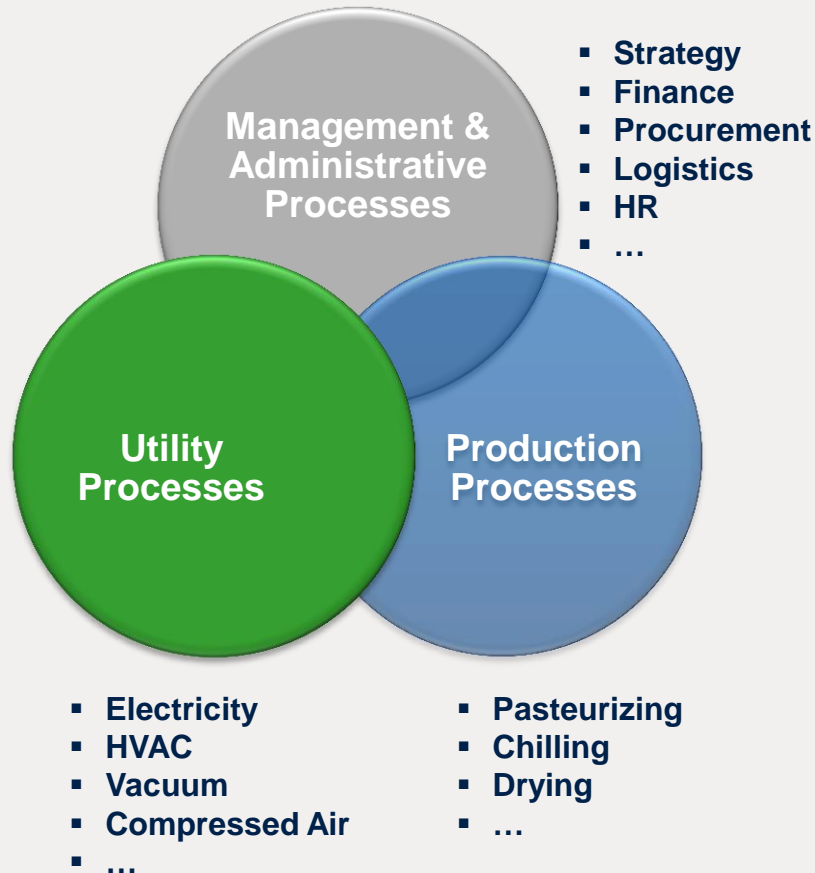

We have delivered over 120 successful projects around the world leading to a total energy cost reduction of more than 70 million Euro/a

CENDID's view on Energy Management

Getting the most out of energy saving potentials

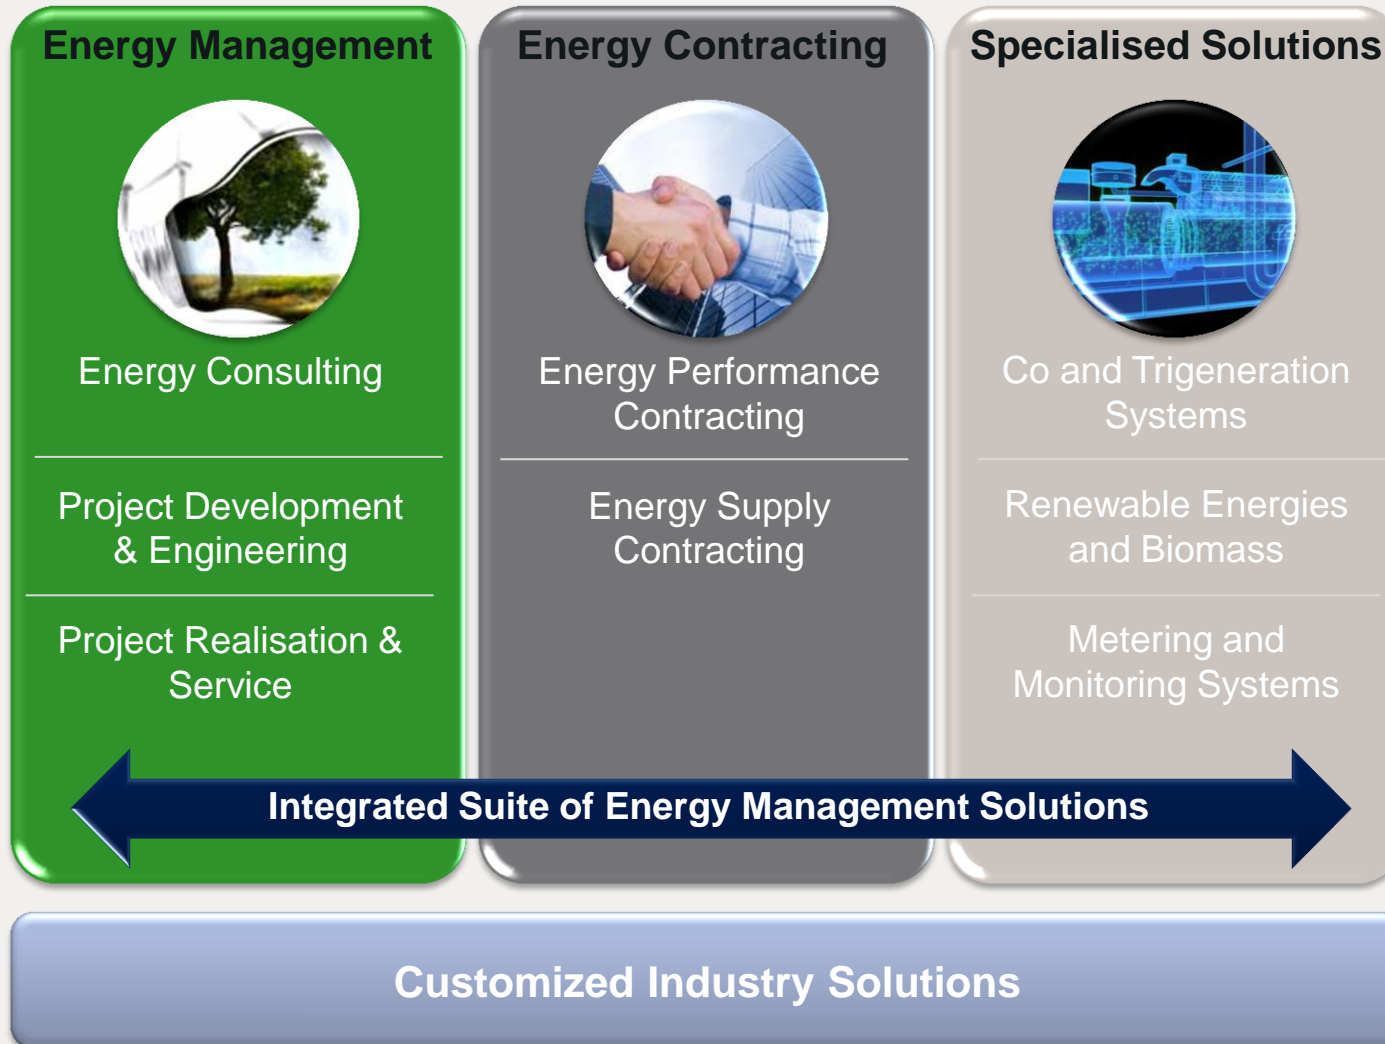

The Energy Management Triangle

- All three areas are impacting energy usage and efficiency
- Dependencies between the three areas – hidden costs
 - e.g. utilities only required because consumed in production process
- Effectiveness and scale of energy efficiency measures can be optimised when considering all areas
 - e.g. smaller trigeneration plant required once consumption is optimised
- Requires a comprehensive energy management system (in line with ISO 50001) to realise majority of benefits

Our Solutions

Our Energy Management Solutions offer a complete suite of end-to-end solutions

What Our Customers Say About Us

“We are impressed by CENDID’s level of competence and professionalism when it comes to energy management. Apart from their know-how and international experience, a major criterion for choosing CENDID has been their high level of flexibility and the independence from product manufacturers and energy providers. I sincerely recommend CENDID as a value added partner to any energy management improvement efforts.”

Hans-Werner Fuchs – Global Manufacturing Excellence Manager @ British American Tobacco

“Choosing CENDID was an easy choice for us. Right from the beginning, CENDID was able to propose a clear strategy on the plant asset management system and hence help increase our revenue. The targets set were easily achieved thanks to the level of enthusiasm for their work. Despite the language and cultural differences, the CENDID team adapted very quickly. Their professionalism and seamless implementation of their ideas reaffirmed our initial faith in CENDID.”

Project Leader @ Hyosung

“CENDID did a great job for the energy management application. Their solution met all our expectations. CENDID’s creativity and passion for the project was infectious, making them really fun to work with. The high level of competence can only come from a team that has rich international experience in industrial consulting and engineering.”

Project Manager @ Siemens
